

Gigaset N870 IP PRO – Thinking bigger goes on

N870: 8 key arguments

new

One hardware – scalable S-M-**L-Enterprise**

Reliable and stable – extensive testing

Latest security standards

Easy setup and configuration

Advanced diagnostics

Interoperability

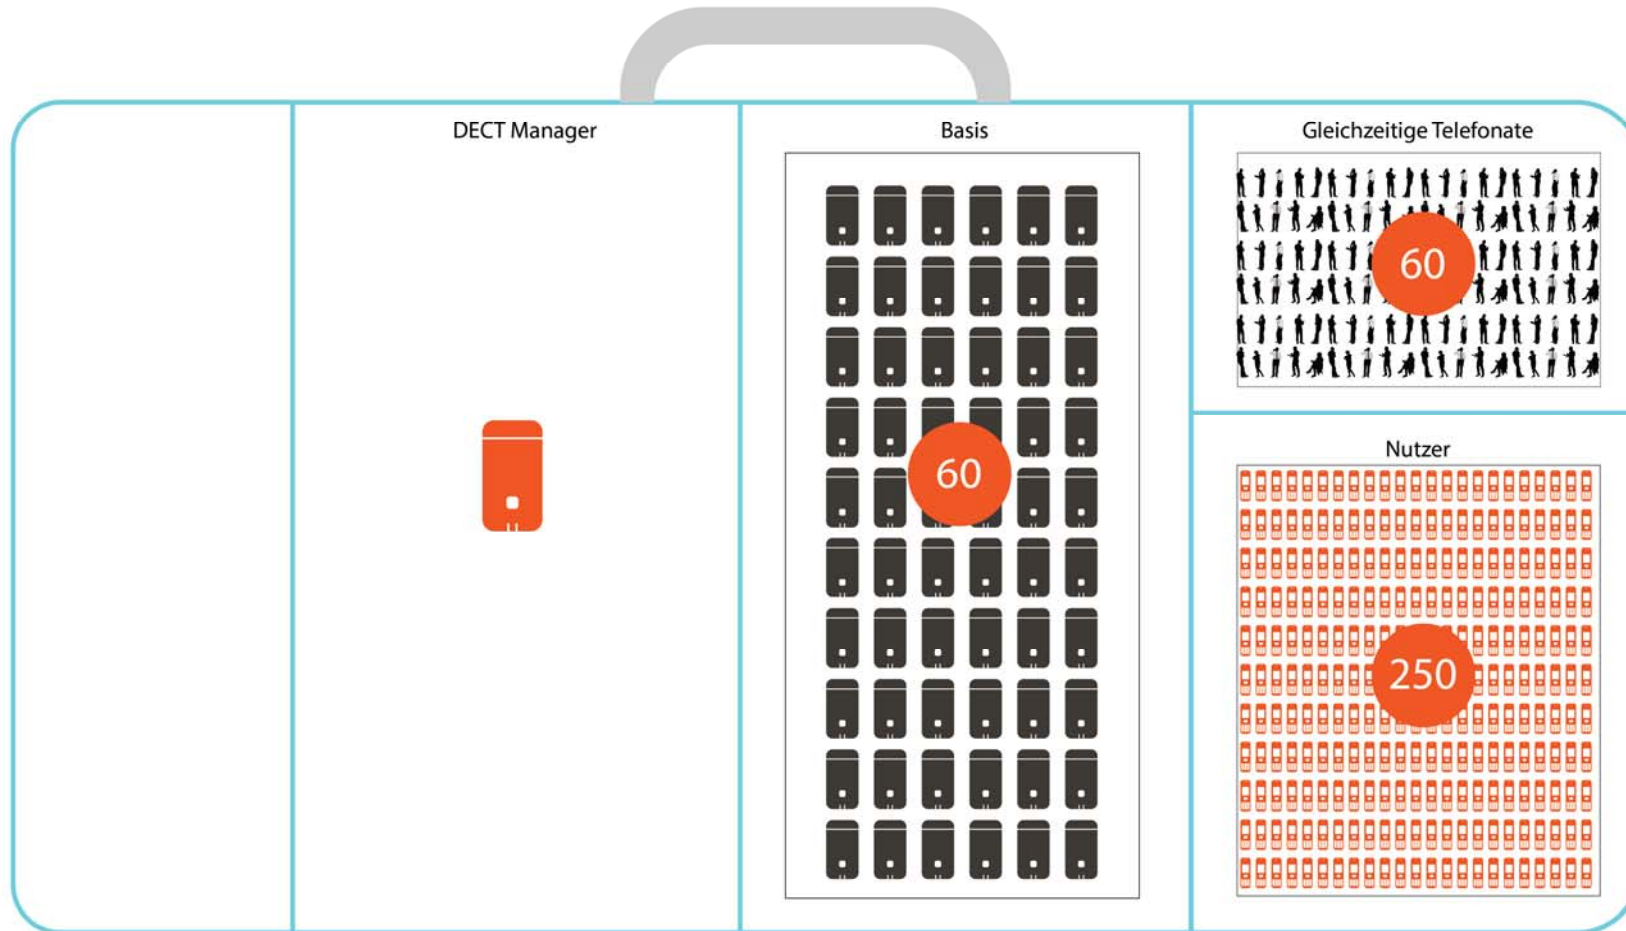

Central administration, e.g. branch solution

Handsets+Maxwell C: design, usability, price/perform. ratio

N870 maximum deployment size until November

DECT-IP

with growth factor

N870 maximum deployment size now

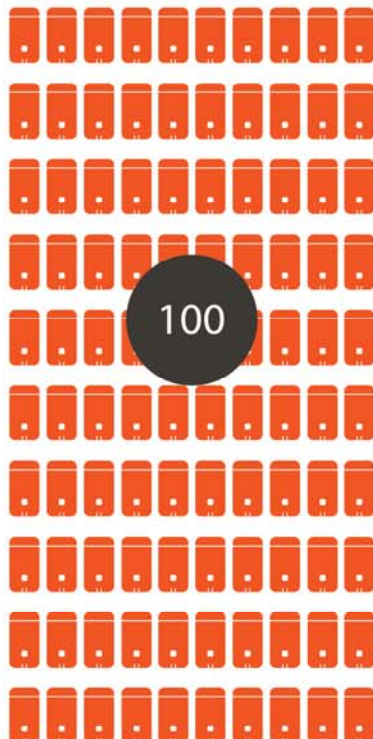

With SW 2.26

Integrator: combining DECT Manager subsystems to one large handover domain

- Central database
- Administration/Web UI /Provisioning
- Handset data
- Roaming and handover

Integrator in 2 deployment alternatives

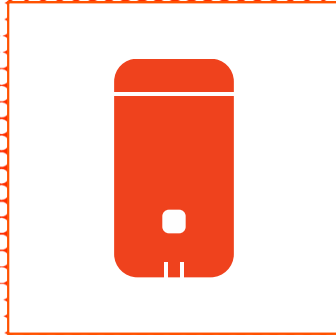

Integrator is needed in following cases

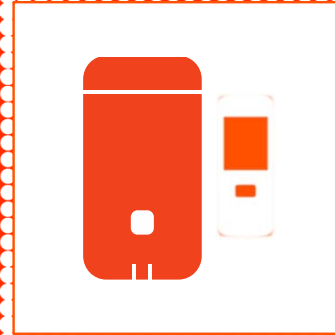

1

> 250 handsets

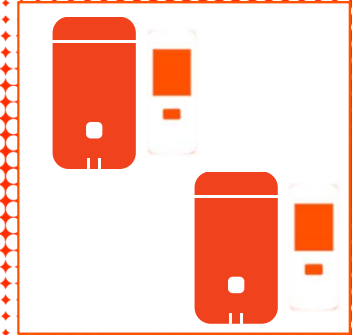

2

> 60 base
stations

3

> 250 handsets
> 60 base
stations

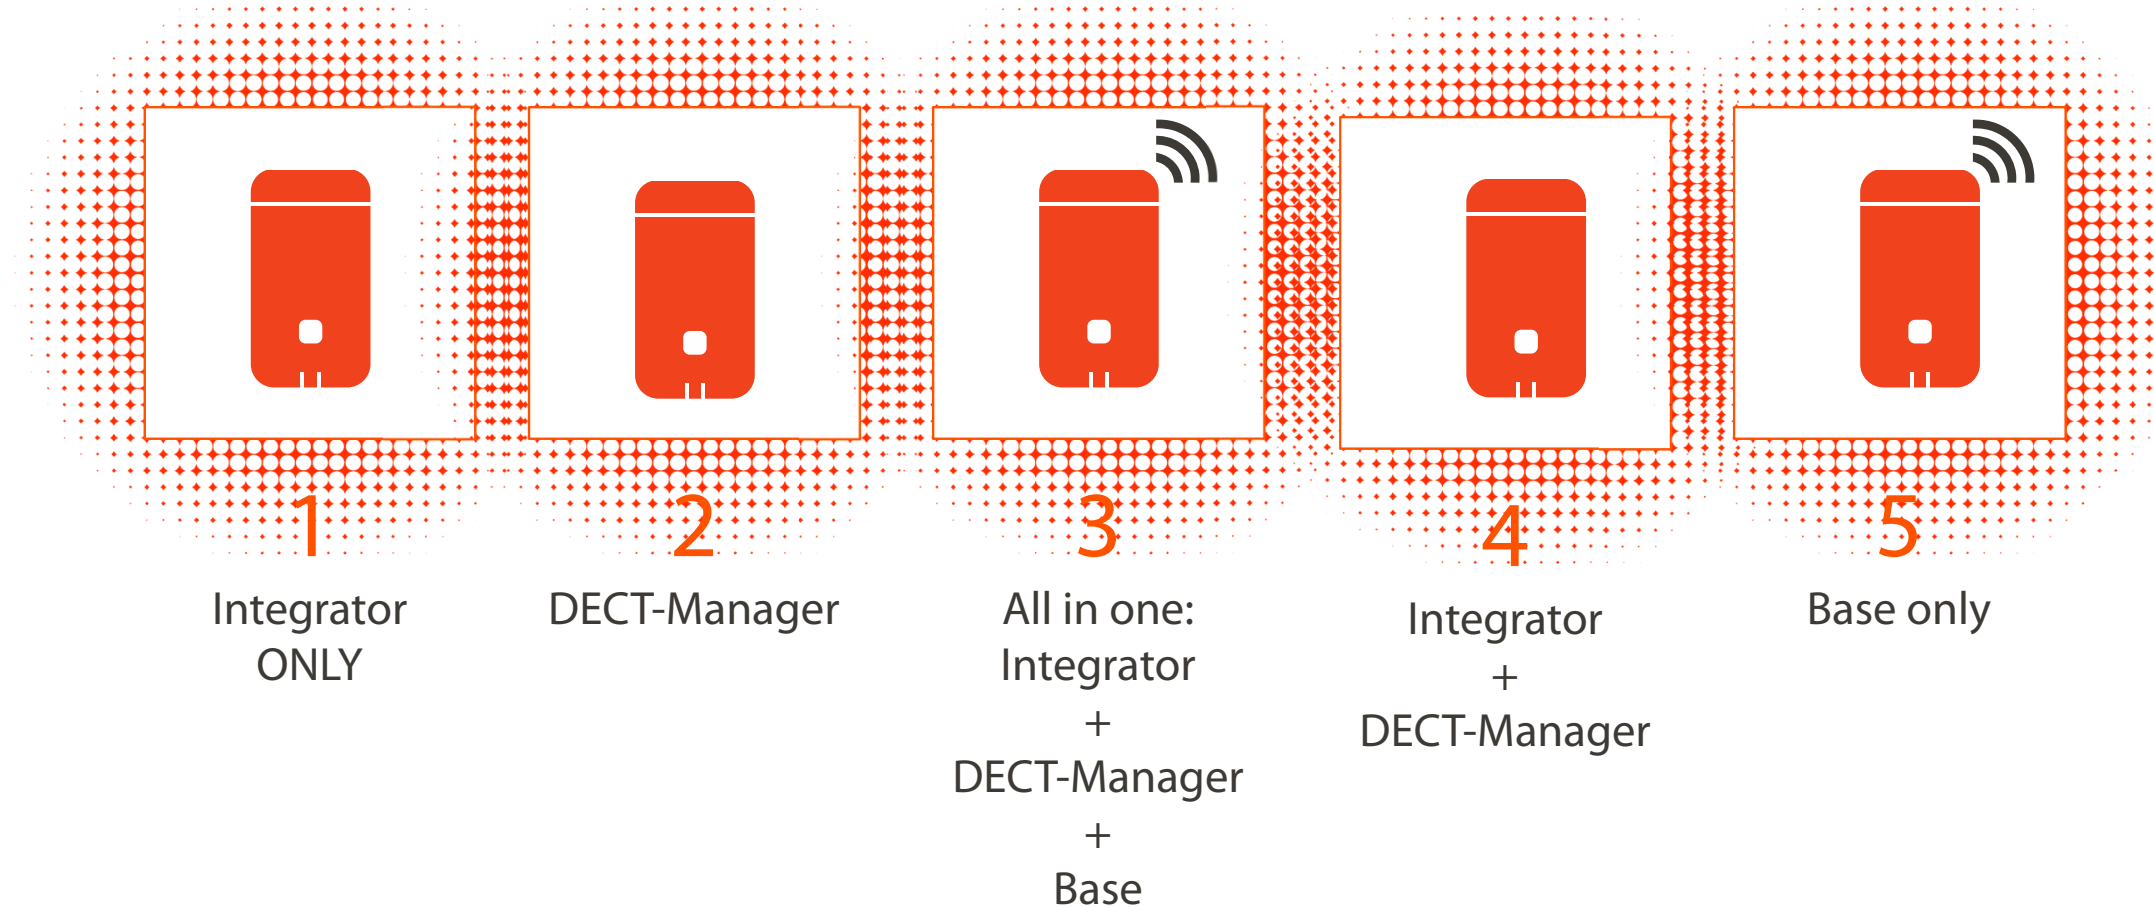

4

> 1 site
with central
administration

**Integrator
available
December 2019**

Licenses

START – N670

Singe cell

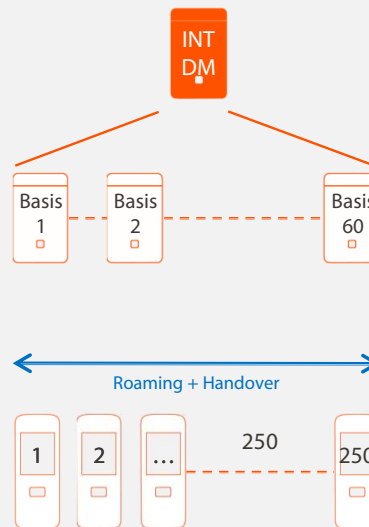

SMALL – N870

All in one:
Integrator + DECT Manager + Base

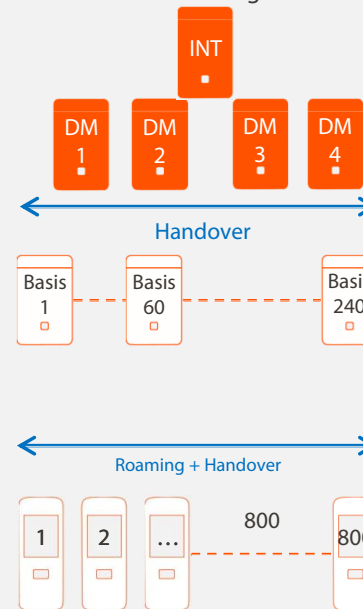

MEDIUM - N870

Base function is deactivated

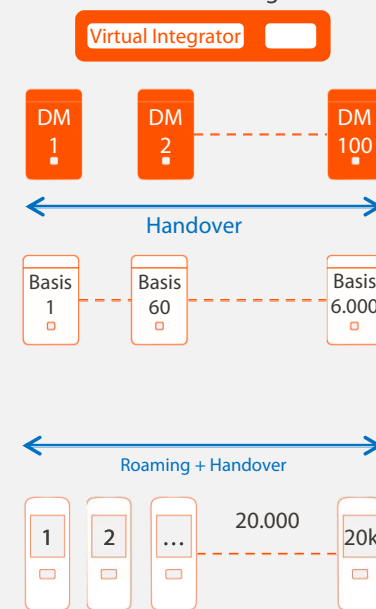

LARGE – N870

Hardware Integrator for up to
4 DECT Managers

Enterprise – N870

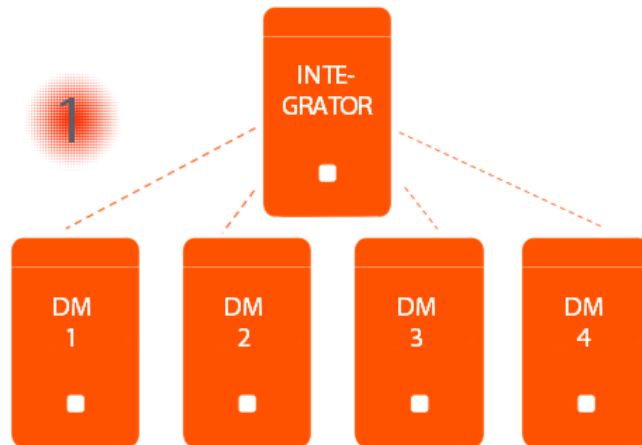

Integrator Software for up to
100 DECT Managers

Available Licenses

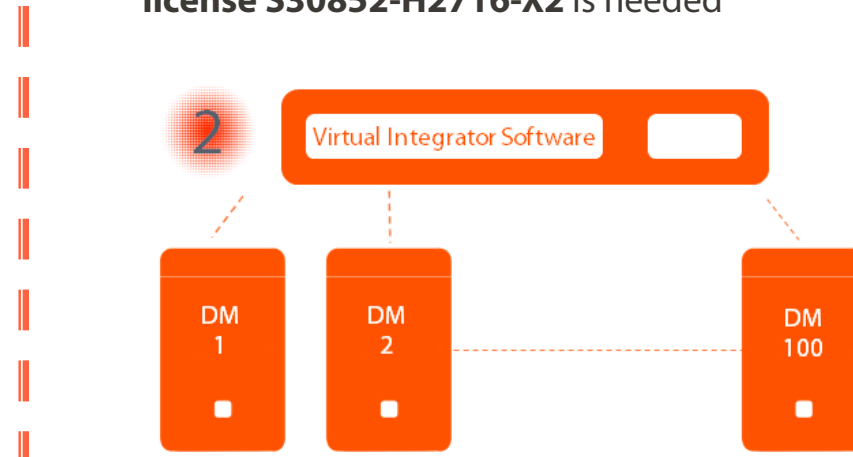

Integrator only mode (up to 4 DECT Managers):

- For each DECT manager a **N870 DECT Manager license S30852-H2716-X2** is needed

N870 Virtual Integrator software (up to 100 DECT Managers)

- One **N870 Virtual Integrator software License S30852-H2716-X1** is needed
- For each DECT manager a **N870 DECT Manager license S30852-H2716-X2** is needed

Note: The License is bound to N870 hardware MAC address.

How to request and activate licenses

The screenshot shows the Gigaset N870 IP PRO web interface. The left sidebar contains a menu with items: Network, DECT Manager, Base stations, Provider or PBX profiles, Mobile devices, Telephony, Online directories, Online services, System (expanded), Web configurator, Licencing, and Provisioning and configuration. The main content area is titled 'Gigaset N870 IP PRO' and includes a 'STATUS' tab. The 'Licence status' section displays a table with columns: Item under Licencing, Available Licences, Used Licences, and Status. The table lists two items: 'DECT Manager - Multi cell' with 4 available and 0 used licenses, and 'Virtual Integrator' with n/a available and n/a used licenses. Both have a status of 'Activation period. Days left: 35'. Below this is the 'Request File' section with a 'Create Request File' button. The 'Licence' section includes a 'Browse...' button, a file entry 'license_request_589EC60E71C...' (14 KB), and 'Upload' and 'Remove queue' buttons.

Item under Licencing	Available Licences	Used Licences	Status
DECT Manager - Multi cell	4	0	Activation period. Days left: 35
Virtual Integrator	n/a	n/a	Activation period. Days left: 35

1. Download the **“License Request File”** from the N870 License page
2. Send the **“LRF”**, the **“License Order-Number”** and the **“Quantity”** of required licenses to GC Order Management ORDERS-PRO@gigaset.com
3. The **“License Activation File”**, received back from GC-OM must be uploaded on the N870 License page to activate the requested licenses.

Note: Only when using the N870 Virtual Integrator software a **Master DECT Manager** must be defined first!

How to request and activate licenses

The screenshot displays the Gigaset N870 IP PRO web interface. The top navigation bar includes the Gigaset logo, a 'SETTINGS' tab, a 'STATUS' tab, and links for 'Language', 'Help', and 'Logout'. The left sidebar lists various system components: Network, DECT Manager, Base stations, Provider or PBX profiles, Mobile devices, Telephony, Online directories, Online services, System (highlighted with a dropdown arrow), Web configurator, and Licencing. The main content area shows the 'Licence status' section with the following information:

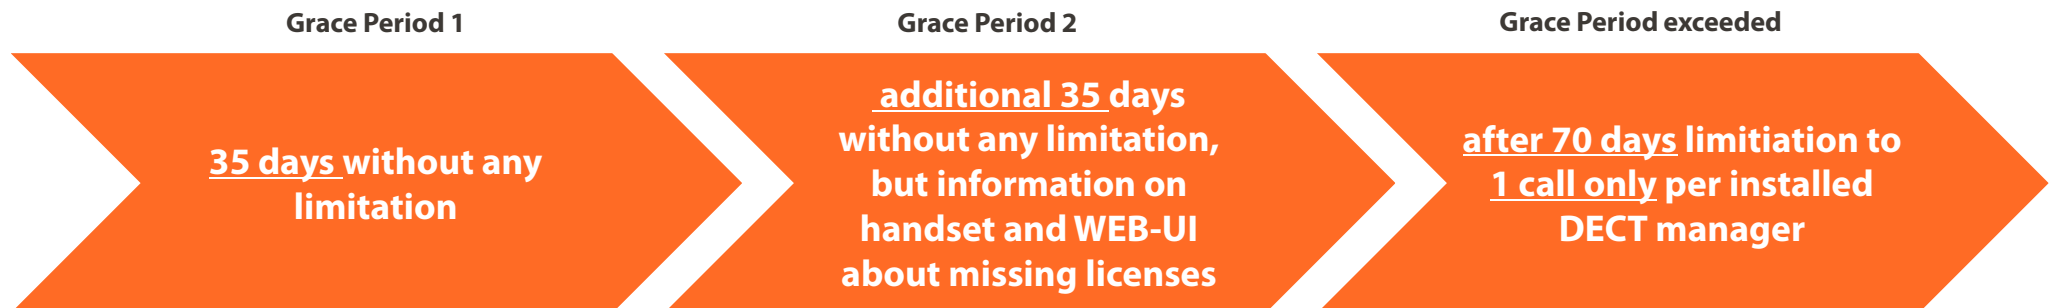

Licence status	
Number of DECT Managers	2 of 4
Licence status	Licence activated

Below this, the 'Request File' section contains a form for the 'Requested number of DECT Managers' with the value '2' entered. A 'Create Request File' button is located below the input field. The 'Licence' section at the bottom features a 'Browse...' button for uploading a license file.

- License status will be shown on the N870 license page.
- Additional licenses can or course be added, following the previous described process.

Grace Period for the N870 Integrator

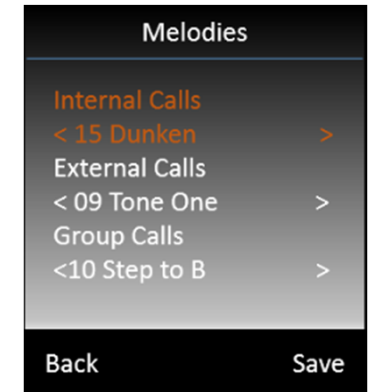

- The N870 Integrator can be tested for 35 days without any limitation and any license purchase. 35 days count
 - after first startup
 - after factory reset
- After 35 days and up to 70 days the message "**Check License Status**" will be shown on **all** installed DECT handsets, for (day 36 – 70 after first startup/factory reset)
- Also a license error message will be shown in the N870 web interface.
- **But**, the system will stay fully functional.
- After a total number of **70 days** after first startup/factory reset the number of parallel calls will be reduced to **1 call per connected DECT manager**, unless a valid license file will be uploaded into the N870

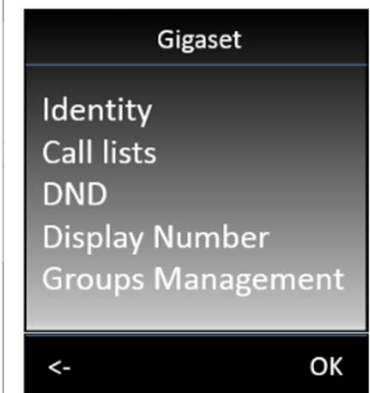

Noteworthy features in firmware 2.26 (Integrator
capable firmware)

N870/N670 - Release 2.26.0 (features besides Integrator support)

- New web-interface languages: German / English / Spanish / French / Italian / Russian / Turkish / Netherlands / Portuguese
- Licensing
- Distinctive ring: Internal, external, door station, group, emergency or user defined call types
- Improved DECT handset registration, up to 10 registrations in parallel can be done
- Central phonebook for up to 2.000 contacts
- xHTML
- 3 party conference
- DE-REGISTER SIP account when handset is switched of or out of range
- Interop with many platforms
 - Auto-provisioning improvements
 - Improved SIP stack / feature set
- LAN synchronization improvements to support larger and lower quality networks
- Improved analyses of running system
 - Visualization tool
 - Syslog output
 - Events (Active calls / Peak calls / LAN statistics)

Distinctive ring

xHTML
