Lifecycle Announcement - On-board Applications (InApps)

This bulletin informs you of the phase out of selected InApps which form part of the UNIVERGE SL2100 and SV9100 portfolios.
NEC have taken this decision based on the market trend now moving towards Cloud-based applications.

The following InApps are included in this announcement.

- **InGuard** – Toll fraud detection
- **InReports** – Call management & reporting
- **InDECT & InAlert** – IP DECT Installation tool and Messaging
- **InHotel** – Hotel Property Management System
- **InScheduler** – Audio and Video conferencing scheduler
- **InSnapshot** – Display images at colour display terminals
- **InSNMP** – Enhanced SNMP information

The following InApps are not included in this announcement and will follow the lifecycle dates given in the recent SAMB [DL61254771 - On Premises End of Life Announcement EMEA](#)

- **PMS-InConnect** – Hotel Front-of-House integration
- **InLMS** – Licence management for UNIVERGE BLUE BRIDGE
- **InOAuth** – OAuth 2.0 support
- **InApp Manager** – InApp Management tool

Support & Software Assurance (SWA)

InApps are not included within the SWA Programme and there are no changes to the current support provided by NEC.

InApps are licenced applications using the NEC Licence Management Server (LMS), the licence is installed onto the host SL2100 or SV9100 system. The InApp obtains its licence activation from the host SL2100 or SV9100.

Licence activation is only required when first installing the InApp and any installed InApps will continue to operate beyond the EON/EOD/EOS dates.

Availability & Order Information

InApps will continue to be available within Prophix CPQ until the EON/EOD date.
