

Roadmap

Atos Unify Management Applications

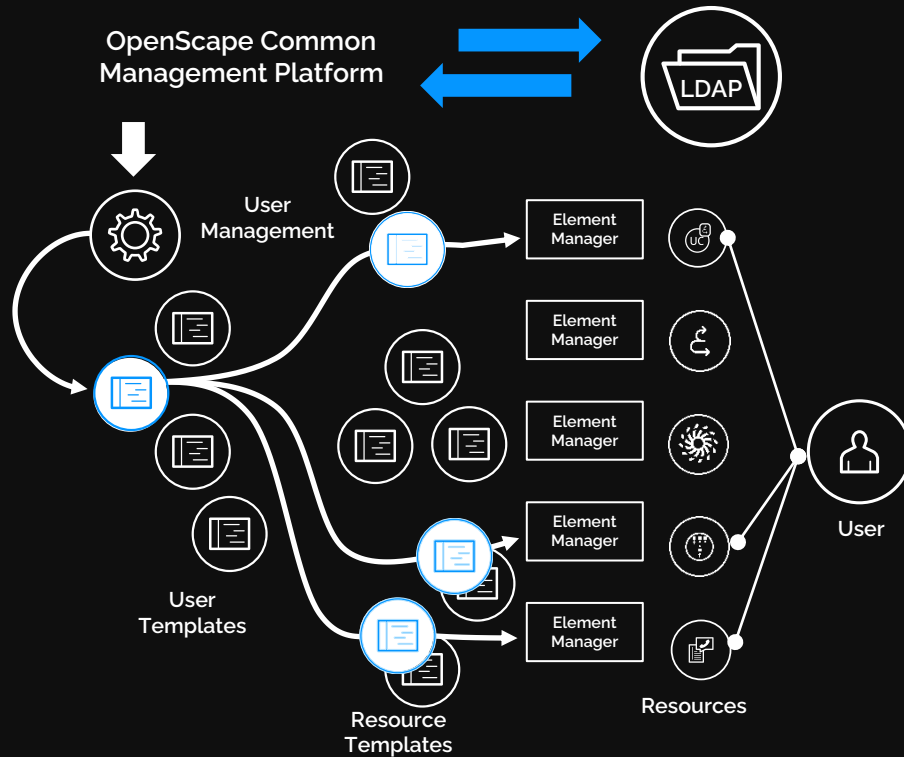

February 2022

01. Atos Unify OpenScape
Common Management
Platform and User
Management

OpenScape Common Management Platform

Central point of administration and automation

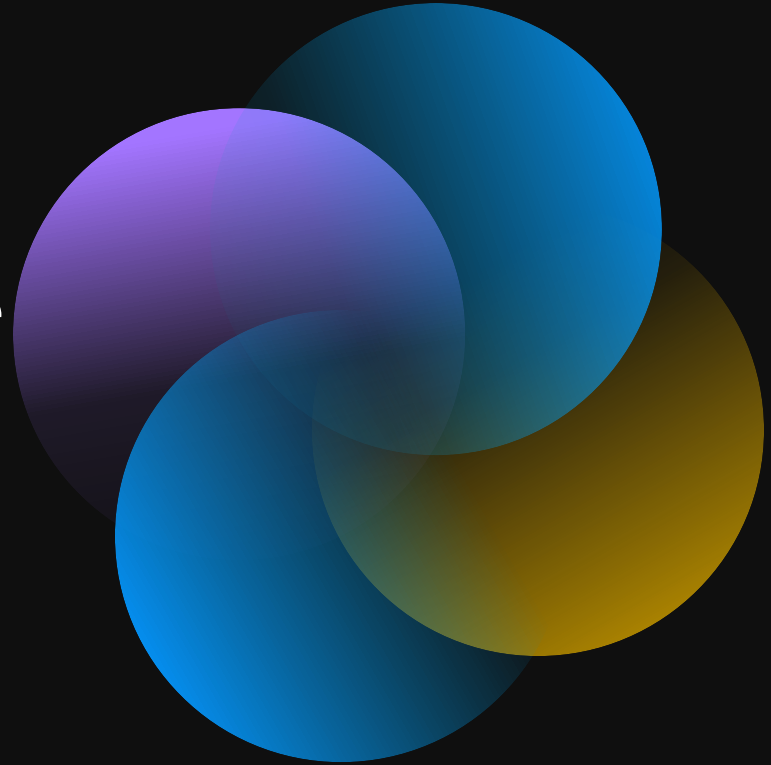

- Integrates all Management Applications in one Suite
- Single sign On for all Management Applications
- User Management as part of CMP
- User-centric philosophy simplifies user administration, reduces costly re-work
- Automatic assignment of resources based on templates
- Can use customer side LDAP Directory as source for user provisioning and changes
- Subscription Licensing "High Water Mark" reporting capability for all Applications

Roadmap

Atos Unify OpenScape Common Management Platform & User Management

	Q4 2021 V10R2 – Available	Q4 2022 V11 – Mid Term	2023-2024 Vx – Long Term
Security	<ul style="list-style-type: none">• JITC DTR6 - Cyber Security• Security enhancements	<ul style="list-style-type: none">• JITC V10 - Cyber Security• Security enhancements• TLSv1.3	<ul style="list-style-type: none">• JITC - Cyber Security• OBSO Roadmap Compliance
Features	<ul style="list-style-type: none">• Automatic generate UC user PINs and passwords• Present new CMP features during login• Preserve Subscriber Feature Settings from UM• Support different numbering plans in User Management - 4K	<ul style="list-style-type: none">• Unify Phone/CloudConnect configuration & provisioning• Support new features of OSV Ecosystem• Improve interface & features for OS 4000 in UM	<ul style="list-style-type: none">• Unify Office Hybrid support• Customer Requested Features
Platform	<ul style="list-style-type: none">• CTO Roadmap Compliance	<ul style="list-style-type: none">• CTO Roadmap Compliance• SLES 15• SSP contract check	<ul style="list-style-type: none">• CLS Connect• CTO Roadmap Compliance

02. Atos Unify OpenScape Composer

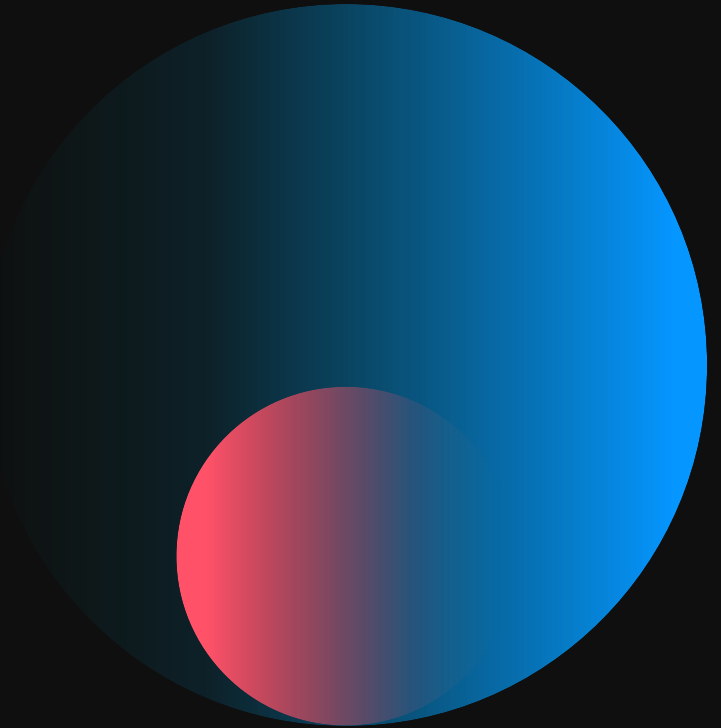

Roadmap

03. Atos Unify OpenScape Deployment Service

OpenScape Deployment Service

Deployment, control and administration of IP devices and clients

- Plug & Play for IP Devices & Device Software Updates
- Enables smooth rollout of UC Clients across organizations
- Reduces setup time and service cost for endpoints by as much as 60-70%
- Centralized deployment of security certificates with optional integration in customers PKI infrastructure
- Centralized distribution of QoS parameters
- Inventory Management
- Device Mobility Management

Roadmap

05. Atos Unify OpenScape Fault Management

OpenScope Fault Management

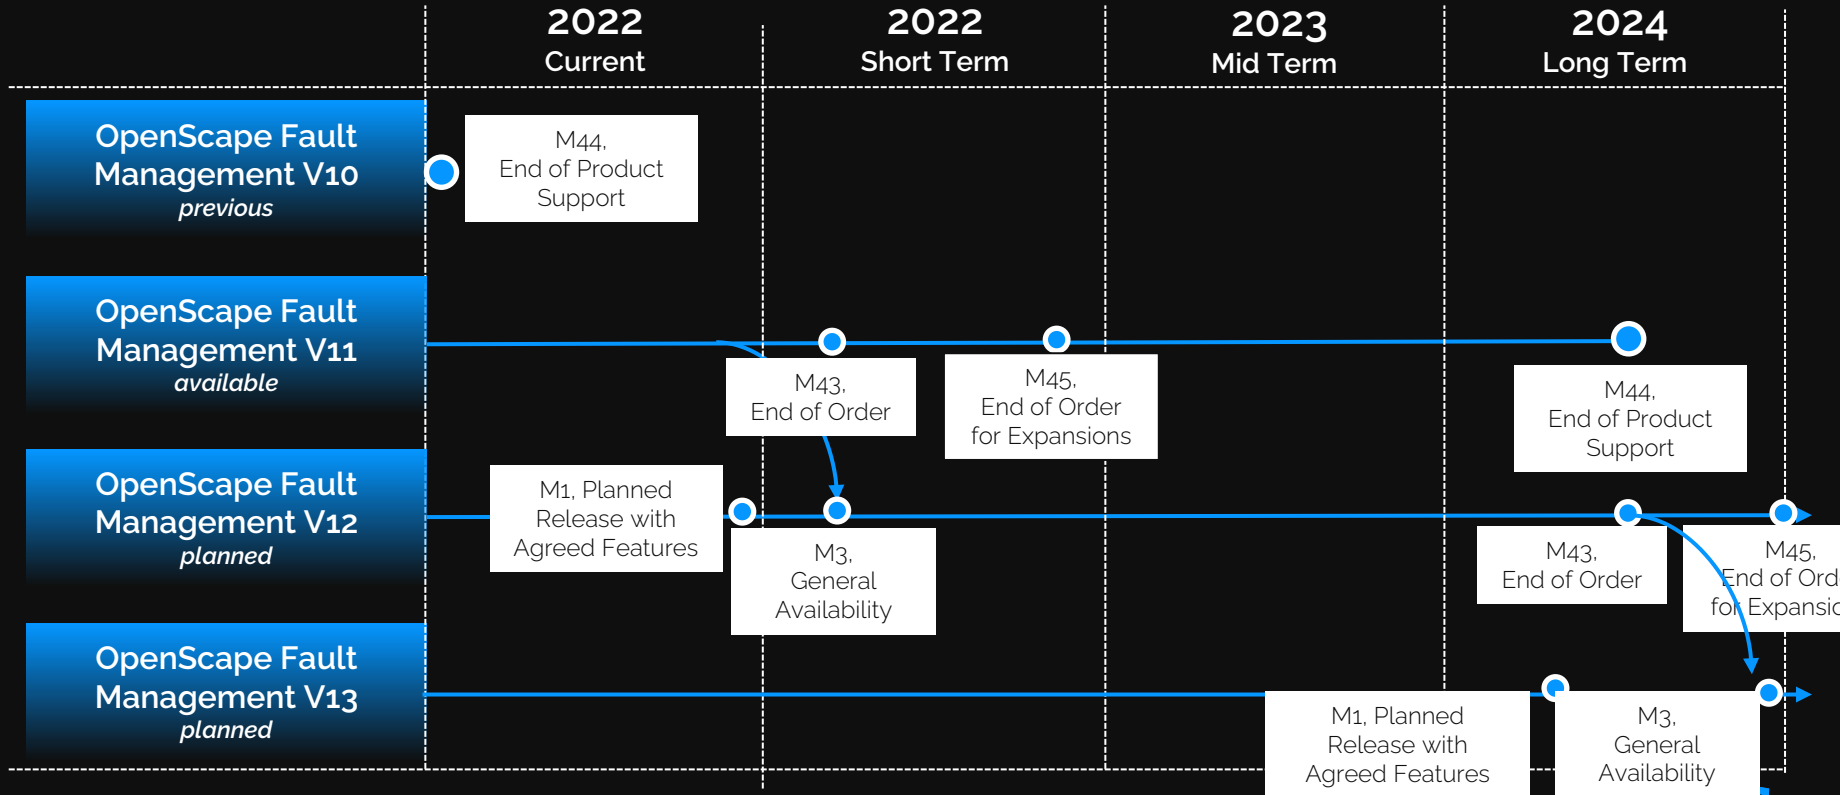

An essential tool for network management

- Proactively monitors, analyzes and corrects issues before issues become service degrading
- Fault, Performance and VoIP QoS monitoring for communication and data networks
- Automatic update and discovery of network elements
- IP Layer 2 / 3 network visibility
- Immediately react to problems before they impact communications
- Automates routing so events are sent to the correct engineer, resulting in quicker problem resolution.
- An essential network management tool that keeps the network healthy and running smooth
- Integration of any IP device plus support of Unify special interfaces
- Provides ready to use MIB's and Templates for Unify Portfolio elements. Turn Key Fault Management for Unify networks
