

 Unify Remote Service Platform

Remote Service Platform v2
try & buy

Remote Service Platform

What is Remote Service Platform try & buy ?

Our Remote Service Platform (RSP) capability provides an efficient, secure and high performance method for the remote maintenance of Unify products.

ATOS / Unify Service and Sales & Service Partners are using the RSP platform, which contains a highly secure server infrastructure to handle connectivity, file exchange and storage with high availability. You have the opportunity to experience the advantages of this service offering for a period of 3 months free of charge, and without any restrictions.

Take advantage of our easy-to-install remote connection to OpenScape Business, take the opportunity to work with other partners in a collaborative model, and use the same platform as the ATOS / Unify Support Experts, to control service cost as you increase customer satisfaction and loyalty.

For more information on Remote Service Platform try & buy, visit the ATOS / Unify Partner Portal and search for Remote Service Platform V2 or contact us at rsp@atos.net

Remote Service Platform
