What is Remote Service Platform try & buy ?

Our Remote Service Platform (RSP) capability provides an efficient, secure and high performance method for the remote maintenance of Unify products.

Unify Service and IC Sales & Service Partners are using the RSP platform, which contains a highly secure server infrastructure to handle connectivity, file exchange and storage with high availability. From April, you will have the opportunity to experience the advantages of this service offering for a period of 3 months free of charge, and without any restrictions.

Take advantage of our easy-to-install remote connection to OpenScape Business, take the opportunity to work with other partners in a collaborative model, and use the same platform as the Unify Support Experts, to control service cost as you increase customer satisfaction and loyalty.

For more information on Remote Service Platform try & buy, visit the Unify Partner Portal and search for Remote Service Platform V2 or contact us at rsp@unify.com
